Shrutika Sunil Chendake

Quality Engineering Analyst | Test Automation (Robot Framework, Selenium, Appium, Python)

Kolhapur, Maharashtra, India | +91 8600767964 | schendake97@gmail.com | linkedin.com/in/shrutika-chendake-06432a1ba

Portfolio: **shrutika-c.github.io/portfolio**

PROFESSIONAL SUMMARY

Quality Engineering Analyst with 5+ years of experience in test automation and quality assurance for web and iOS mobile applications at Accenture. Builds scalable, data-driven automation frameworks using Robot Framework, Selenium, Appium and Python. Maintains 400+ regression scripts, reduced manual testing effort by 60–70%, and led the test management migration from HP ALM to Jira + Xray. Experienced in Agile/Scrum delivery, CI/CD integration and end-to-end defect management across SIT, UAT and regression cycles.

TECHNICAL SKILLS

Test Automation: Robot Framework, Selenium WebDriver, Appium, Python, Custom Keyword Libraries, Data-Driven and Keyword-Driven Testing

Mobile Testing: iOS Testing, Xcode, iOS Simulators, Real-Device Testing, Device Log Analysis

Testing Types: Functional, Regression, Integration, SIT, UAT, IQ, Smoke, Sanity, Database, Manual

Test Management: Jira, Xray, HP ALM, QE TestHub, Test Case Design, Traceability (RTM)

DevOps and Databases: CI/CD, Git (branching, pull requests), SQL, MS SQL Server

Methodologies: Agile, Scrum, SDLC, STLC, Defect Lifecycle Management

PROFESSIONAL EXPERIENCE

Quality Engineering Analyst — Aug 2021 – Present

Accenture, Pune, India

Project: SMART (Web and iOS Mobile Applications) — Jan 2025 – Present

- Built a reusable Web UI and iOS automation framework with Robot Framework and Appium, achieving 70% code reuse.
- Maintain 400+ regression automation scripts across 4+ release and sprint cycles, reducing post-release defects.
- Design and run automated and manual test cases covering 100% of end-to-end web and iOS scenarios.
- Conduct IQ, SIT, UAT, sprint and full regression testing, raising the defect detection rate by 45%.
- Troubleshoot critical defects using Xcode, Appium and device logs, cutting root-cause analysis time by 50%.
- Test on real iOS devices and simulators, expanding device compatibility coverage by 60%.
- Work with business analysts and developers to turn requirements and acceptance criteria into test scenarios.

Project: Solix CDP — Feb 2023 – Dec 2024

- Led the HP ALM to Jira + Xray migration, improving test execution tracking, defect traceability and reporting.
- Built an end-to-end regression automation suite in Robot Framework, reducing manual testing effort by 60–70%.
- Created data-driven components and custom Robot Framework keyword libraries, raising automation coverage by 40%+.
- Improved framework stability and cut execution time by 30–40%, readying the suite for CI/CD integration.
- Wrote manual and automated test cases for new features, achieving 100% requirements traceability (RTM).
- Peer-reviewed test cases and automation scripts to keep coding standards and coverage consistent.
- Took part in sprint planning, grooming and defect triage, supporting releases with zero critical production defects.

Enterprise Applications — Aug 2021 – Jan 2023

- Executed manual and automated functional, integration and regression test suites within Agile/Scrum teams.
- Managed the end-to-end defect lifecycle in HP ALM and Jira, from logging and triage to retesting and closure.
- Validated backend data with SQL queries on MS SQL Server to confirm application results against the database.

EDUCATION

Bachelor of Engineering in Computer Science | Walchand Institute of Technology, Solapur | 2021 | CGPA: 8.2/10

AWARDS

Skill STAR Award and **ACE Award** | Accenture
